Location: São Bernardo do Campo – SP.

OBJECTIVE

Act as **full stack developer** in **NodeJS** and/or **Java with Spring boot** on the back end.

PROFILE

I am a **dedicated, organized and methodical individual**. I really like to **help my teammates**. I am keen and very **willing to learn** and **develop new skills** because I am **passionate about my field**, and this is one of the reasons that I always determined to **make a difference** in each project that I work on.

EXPERIENCE

04/2021 – present
GBS associates | IBM

• Development of supervised projects.

Project of **Star Wars API**, I built an application in Java with Spring boot with the following tasks performed:

- Elaboration of entity-relationship model (**ERM**).
- **Spring data JPA** to interact with **MySQL**.
- Authentication via web token with **JWT**.
- Users control by profile.
- Segregated environments.
- **Unit tests** and **integrated tests**.
- **Swagger documentation**.

Project of **time-clock control**, I built an application in Typescript with NodeJS on back and React Native on front, with the following tasks performed:

- Elaboration of entity-relationship model (**ERM**).
- Backlog organization via Trello (**kanban**).
- Design elaboration via **Figma**.
- Authentication via web token with **JWT**.
- **TypeORM** to interact with **Postgress**.

05/2021 – 03/2022

Application developer | IBM (Bradesco saúde project)

Development of innovations in the logged side of health establishments.

- Front-end development with HTML, CSS and JS with JQuery.
- Back-end development with Struts in Java.
- Integration with API's in JS.
- Unit tests using JUnit in JS.
- Automated tests with Selenium and Junit in Java.

I HAVE BEEN STUDYING...

- Formation Spring Framework – Alura Cursos Online
- Formation Node.js with Express – Alura Cursos Online
- Formation Software engineering – Alura Cursos Online
- Architecture and Design of Java Projects – Alura Cursos Online

EDUCATION

Bachelor of Science and
Technology

UFABC (2018 – 2023)

&

Computer Science

UFABC (2020 – 2024)

MAIN TECHNOLOGIES

- Java with Spring Boot;
- NodeJS in Typescript;
- React native in Typescript;
- Angular in Typescript;
- HTML, Java Script and CSS;

Databases

- MySQL, Postgress, H2;

Tests

- Selenium, Junit, Jest, Mockito;

PROJECTS

- Time-clock control (NodeJS and React Native);
- Plan my vacation (NodeJS);
- API STAR WARS (Spring Boot);
- API inventory control for books (NodeJS);
- API Brazilian holidays (NodeJS);
